Sorry about that, I thought Kenny had answered you (and he probably thought I had answered you).

The area in question has not been previously surveyed and so a cultural resource survey would be required prior to any ground disturbance.

Several week ago I gave you a letter from SHIPO in which their recommendation for a survey on lands held by Anasazi Gold was very vague. Essentially you and Kenny told me that we would require a survey. I need something in writing that I can send to DOGM makeing that request. An E-mail would do.
